EFFICIENT CARE  
MANAGEMENT SYSTEMS  
– SIMPLIFYING THE  
MANAGEMENT OF CARE

**fastroi**  
– Caring together –

# Fastroi

Care management system. A digital platform to simplify the way we care. Care planning should not be difficult or complicated, quite the reverse: It should be as easy as possible.

This is why we at Fastroi have developed an intelligent Care Management System which simplifies the care process and promotes genuine encounters between people in various care work environments. This allows truly integrated care from health and care providers.

Sometimes we also need a little help from technology to create more time for the simple things that really matter.

## BENEFITS

- Our customers have made 25-30 % cost and time savings in their daily routines
- Quality of care improves through real time reporting and data management
- The system includes lots of standard interfaces, allowing easy integration with various background systems.

Attendo 

*Attendo Oy belongs to the Swedish Attendo group and is Scandinavia's leading care and healthcare service company with 7750 employees in Finland. Attendo has some 150 care and service homes in Finland.*

”

We wanted to implement a versatile care management system that covers customer reporting and invoicing as well as other reporting needs.”

**PIIA OKSANEN**  
System Coordinator at  
Attendo Oy

## Fastroi Real-Time Care™ - for home care and housing services

Finnish made, Real-Time Care™ is the domestic market leading Care Management System. Manage the care process with connected care plans, scheduling & paper free reporting. Customised for your needs with interfaces and extension options. Patient-centric care and process management makes regulatory compliance simple for many care sectors.
